## RESTRICTION

1. Applicant's amendment filed on 10/21/01 has been entered. Claim 11 has been amended. Claims 1-13 are pending in the application.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3 and 7 drawn to a gene, further election of invention required (one SEQ.ID.NO required).

Group II claims 4- 6 and 11 drawn to a recombinant protein and antigen

Group III, claims 8-10 drawn to an antibody.

Group IV, claim 12 drawn to a method for diagnosing equine babesiasis using a polypeptide.

Group V, claim 13 drawn to a method for diagnosing equine babesiasis using antibody.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is drawn to a gene, which is the first product. The special technical feature is the gene (polynucleotide), which is made up of nucleic acids. Groups II-III are drawn to structurally different products such as amino acids and antibodies which do not require each other for their practice and do not share the same or a corresponding technical feature. The Group IV and V inventions are drawn to methods having different goals, method steps and starting materials, which do not require each other for their practice and do not share the same

Art Unit: 1645

or a corresponding technical feature. Note that PCT Rule 13.2 does not provide for multiple products or methods within a single application. Since the special technical feature of the Group I invention is not present in the Group II-V claims, and the special technical features of the Group II-V inventions are not present in the Group I claims, unity of invention is lacking.

### **DISTINCT INVENTIONS**

3. This application contains claims directed to more than one invention in-group I. These inventions are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1 as different sequences are considered as unique, different and distinct inventions.

The inventions are as follows:

SEQ.ID.NOS. 1 and 2

The inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the inventions lack the same or corresponding special technical features for the following reasons: Sequences listed as SEQ.ID.NOS; 1-2 are different to each other and lack the same or corresponding special technical features. Applicant is advised to elect one SEQ.ID.NO from group I with specific nucleotide sequence.

4. Applicant is required, in reply to this action, to elect a group and one sequence and identify the SEQ.ID.NO to which the claims shall be restricted. The reply must also identify the claims readable on the elected invention, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Padmavathi v Baskar whose telephone number is (703) 308-8886. The examiner can normally be reached on M-F (6:30A.M-4: 00 P.M.) First Friday off.

Art Unit: 1645

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynette Smith can be reached on (703) 308-3909. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
